## Low Profile BREWING

### ACE-LP

Newco designed the ACE series of brewers to satisfy customer requests for a multi-feature specific brewer suited for the office environment. The series is quite versatile and continues to be our top selling line.

ACE models incorporate unique design features that include: a water level detection system that eliminates evaporation short pots, an adjustable brew safety light which flashes during the brew cycle to alert the user the brew cycle is in process, and a gravity hot water faucet system which dispenses hot water while brewing without altering the brew volume.

All the features are built into a stainless steel cabinet for long stability and durability. Newco, making you successful your way.

Decanters not included

Brewer also available  
with black vinyl upper wrapper
